RE: Nutrient Offset Plan Report

Dear Mr. Davis:

This letter serves as the nineteenth installment of the Pinnacle Foods Group LLC's Nutrient Offset Plan Report. As required by Special Condition #7 of Pinnacle's NPDES Permit DE 0000736, "The permittee shall submit progress reports every six months outlining actions taken toward implementing this plan".

Spray irrigation operations have not yet begun in 2010. We plan to begin next week. On April 7, 2010 30-lbs/acre nitrogen (ammonium sulfate) and 120-lbs/acre of potash (muriate of potash) were applied. The field was cut and baled (37 bales) the last week of May. We also baled (12 bales) in January that we were unable to get in 2009 due to wet conditions for a total of 49 bales thus far in 2010. Weed killer was applied on June 21st.

Should you have any questions please call me at 302-934-3833.

Sincerely,

A handwritten signature in black ink that reads "Bob Lynch". The signature is written in a cursive, flowing style.

Bob Lynch
Environmental/ Wastewater Supervisor
